

# **Action, Creativity and Learning, for Healthy, Sustainable, Regenerative Futures 'OPEN MIC'**

**TUESDAY JULY 12 2022, 12.00-13.30 London Time**

Open mic is a live show often taking place in a venue like a club or pub in which performers have a timed slot to share their artistic creations which may take many different forms - like comedy, music, poetry or story. It is a lively, informal format aimed at encouraging creativity.

You are invited to join our first Open Mic Zoom event comprising 7 x 10min contributions in which participants share stories and insights gained from their collaborative action learning projects aimed at improving understanding of the way in which individuals and groups of people can bring about healthy change in their world by engaging with one or more of the Sustainable Development Goals – SDGs.

By adopting this format we are encouraging creative self-expression and trying to stimulate new collaborations for creativity. Contributions may take any number of forms for example a story, a narrative picture, comic strip/spoken word combination, animation, movie, poem, song, dance, play the possibilities are endless and we encourage participants to be imaginative.
