COLLABORATIVE INQUIRIES

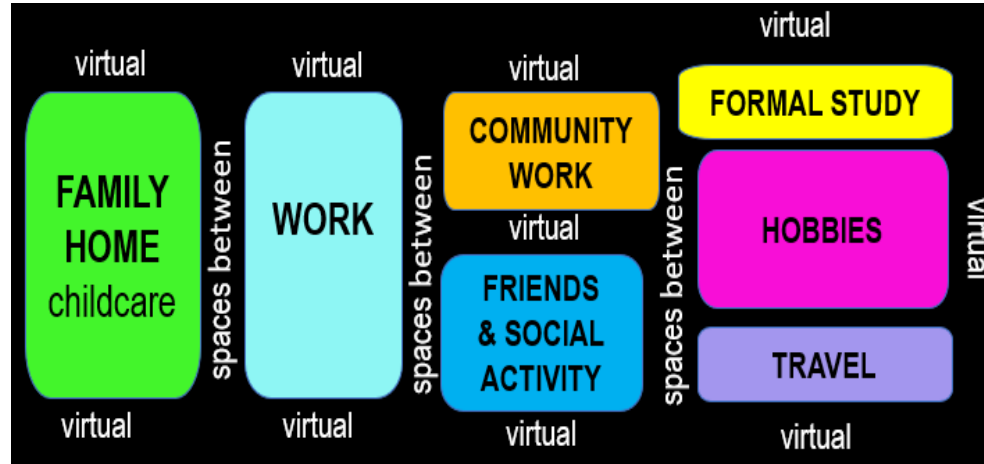

'the whole of life is learning therefore education has no ending' (Lindeman 1926)

OUR PATHWAY THROUGH LIFE: LIFELONG-LIFEWIDE FORMATION

Lifelong learning is the integration of learning and living (Carlsen 2014)

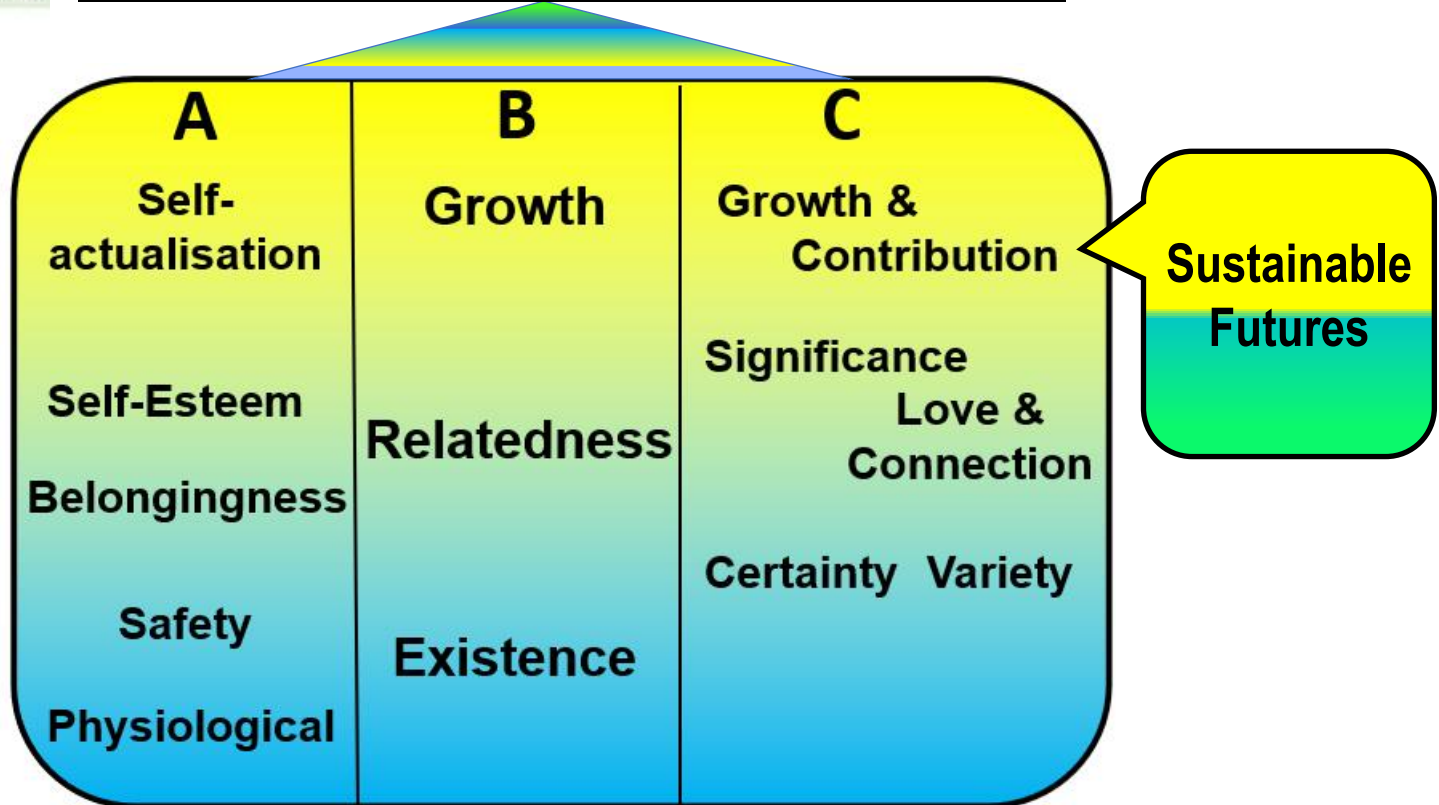

OUR NEEDS – THE DRIVING FORCE FOR LIVING & LEARNING

A Maslow -
Hierarchy of Needs

B Alderfer -
ERG Model of Needs

C Robbins -
Six Human Needs

LEARNING TO LIVE FOR A MORE SUSTAINABLE FUTURE

‘the primary purpose of learning is to learn how to live on this tiny planet’ (Barnett 2022)

To live for a more sustainable future we need to act and learn in the environments that form our life in ways that are informed by the SDGs

OVER HALF 169 SDG targets depend on nature for their achievement

Helping nature and the environment will help us contribute to a more sustainable future.

By helping nature we are helping ourselves.

OUR PATHWAY TO A MORE SUSTAINABLE FUTURE

PATHWAYS TO A MORE SUSTAINABLE FUTURE

BEGIN WITH AN IDEA

Norman's B-Line

SDG 15 Life on Land

T15.5 Protect Biodiversity & Natural Habitats

T 2.4 Sustainable Food production

A few months ago I came across Biodiversity Lines (B-Lines) – a simple but powerful idea to help nature halt the decline of insect pollinators by encouraging people to cultivate more wildflowers to provide food for pollinators and enhance their ability to migrate. Flourishing populations of pollinators are essential for crop production for both human and animal food.

The Surrey Hills B-Line is very close to my home: by making my own B-Line I can enhance what already exists. My intention is to:

- 1) Leave my lawn and field unmown
- 2) Cultivate new wildflower habitats in a field and woodland
- 3) Observe, record and evaluate the effects and learn through the experience

OUR PATHWAY TO A MORE SUSTAINABLE FUTURE

LEARNING, APPRECIATION & RECOGNITION

1 RECORD OUR EXPERIENCES, ACHIEVEMENTS & LEARNING

Any format – e.g. word doc, blog, photos with commentary, audio/video, scrap book, comic book, movie....

2 SHARE ASPECTS OF OUR JOURNEY & LEARNING

Once a month post in the Pathways Forum & participate in Pathways Zoom meeting (first week of month) so that we can learn together

3 SHARE WHAT WE HAVE LEARNT IN A DIGITAL STORY & MAGAZINE

At the end of the process using any medium and format

PATHWAYS WEBPAGE

PATHWAYS TO MORE SUSTAINABLE FUTURE
Lifelong-lifewide learning on behalf of nature, the environment and sustainability
April-September 2023

Collaborative inquiry
for a more
sustainable future. This lifelong-lifewide
learning initiative is open to anyone of
any age or background. Our goal is to
help us learn to live lives that are more
likely to help nature and the environment
and contribute to a future that is more
sustainable. We will do this by creating
our own pathways along which we can
journey with other people who also want
to mitigate the damage humans have
inflicted on our planet and the life it
supports. Pathways to a more
sustainable future is intended to
demonstrate how participating in lifelong-lifewide learning that is undertaken on
wellbeing, can be encouraged, supported and recognised.

Zoom launch meeting on Monday April 3rd 19.00 -20.00
If you would like to participate in our action and learning for nature, environment & sustainability community and contribute to
this initiative please email Norman Jackson lifewider@gmail.com
